

Fretless 5-string bass guitar

Serial # 009

009

In many card games, The Joker is the only guy who is generally considered able to be whatever he wants. In historical terms, that's because the joker - the liminal aberration, the shaman, the trickster, the br'er rabbit - was the guy who generally had the balls to step into the roles that most found too daunting. And then to change roles just when the king's court thought they had him all figured out.

009 is the first Joker.

Detailed specifications
